

Let's Give Nature a Home

By Dan and Sophie Black.

Garden Birds

- We are members of the RSPB. we keep an eye on the birds that visit our garden.

Bird Boxes

- We made bird houses out of milk cartons and filled them with grasses and straw.
- We painted wooden bird houses and hung them up in our garden.
- We fill up our bird feeders to feed the hungry birds.

A Bug Hotel

- We made our bug hotel with pipes, twigs, hay and dry leaves.
- We put in fruit and sugar to attract lots of minibeasts. I think they'll like it!

A Home for a Hedgehog.

- We made a new home for a hedgehog. We made it from a cardboard box. We added lots of hay and dry leaves.
- We chose this quiet spot. We chose this spot because we had seen a hedgehog here a few days ago. I hope they come back again.

Flowers

- We planted sunflowers and put them into our polytunnel to help them grow. When they grow bigger, we'll plant them in the garden.
- We planted a mixture of bright and colourful flowers in our garden to attract lots of bees.
- We leave a wild garden around the edges to let wild flowers grow –
 Don't mow, let it grow!
- We gave them lots of water in the hot weather and some water for us too!
